

FACULTY OF COMPUTING

SEMESTER 2 2025/2026

SECP3106 – APPLICATION DEVELOPMENT

SECTION 01

LAB ASSIGNMENT 1

Topic:

Daily Activities Recorder App

Lecturer: Dr Ahmad Najmi bin Amerhaider Nuar

Name: Woo Cheng Shuan

Matric No.: A23CS0283

Objective

This lab assignment aims to create a simple app that records and displays daily activities. The application is aimed at assisting users in keying in the information about the activity, including the name of the activity and the time or category, and presenting it in a list. By applying the knowledge gained in Lesson 1, 2 and 3, I am able to develop a simple Flutter application by using basic concepts such as widgets, user input, state management with `setState()`, and dynamic data display using a list.

Brief Description of the System

The Daily Activities Recorder App is an easy mobile application that allows users to organize their daily activities. The system provides an user to input an activity and its associated time or category using the input fields. Upon clicking the “Add activity” button, the data typed in is stored and a list of data appears on the screen.

The list displays each activity with the name of the activity and the time or category of that activity and a delete button that enables the user to delete the undesired activities. Using simple Flutter elements like `TextField`, `Button`, and `ListView`, the application is dynamically updated with `setState()` each time a new activity is added or removed. The system is to be straightforward, easy to use, and to be understood by beginners.

Explanation of the interface

Activity Field: To enter activity

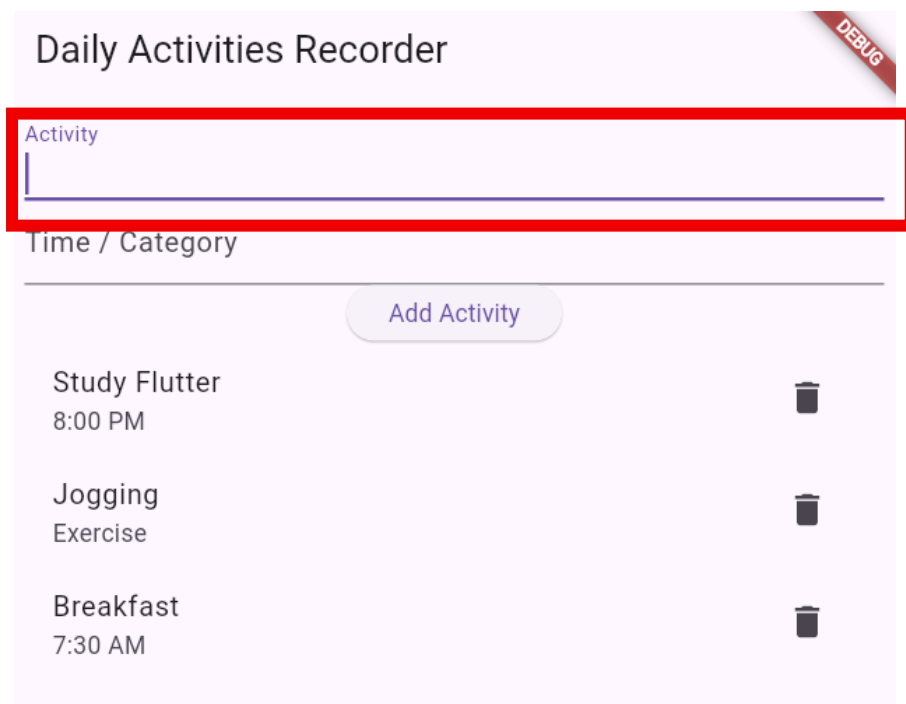

Time Field: To enter time/category

Add Activity button: To save the activity

Activity list: Shows all activities

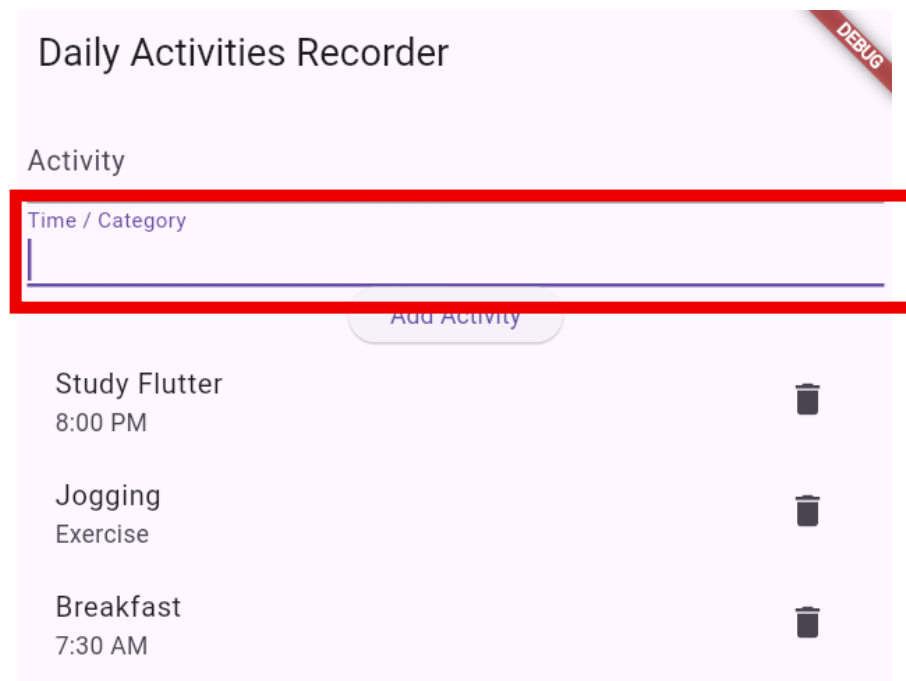

Delete button: To remove the activity

Screenshots of the app

The screenshot shows the 'Daily Activities Recorder' app interface. At the top, there is a title bar with the text 'Daily Activities Recorder' and a red 'DEBUG' banner in the top right corner. Below the title bar, there is a text input field labeled 'Activity' which is highlighted with a red rectangular border. Below this field is a section header 'Time / Category' followed by a horizontal line. Under the line, there is a button labeled 'Add Activity'. Below the button, there is a list of activities: 'Study Flutter' with time '8:00 PM', 'Jogging' with category 'Exercise', and 'Breakfast' with time '7:30 AM'. Each activity entry has a trash icon to its right.

Figure 1: Activity input field

The screenshot shows the 'Daily Activities Recorder' app interface, similar to the first one. It has the same title bar with 'Daily Activities Recorder' and a red 'DEBUG' banner. Below the title bar, there is a text input field labeled 'Activity'. Below this field is a section header 'Time / Category' followed by a horizontal line. Under the line, there is a button labeled 'Add Activity'. Below the button, there is a list of activities: 'Study Flutter' with time '8:00 PM', 'Jogging' with category 'Exercise', and 'Breakfast' with time '7:30 AM'. Each activity entry has a trash icon to its right. In this screenshot, the 'Time / Category' input field is highlighted with a red rectangular border.
